DETAILED ACTION

1. This application has been examined. The claims 1-23 are allowed.

Examiner's Amendment

2. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mr. Joe McKinney Muncy on 12/28/06.

3. Cancel claims 24-30.

Reasons For Allowance

1. The following is an examiner's statement of reasons for allowance: The present invention is directed to a method for driving an LCD, wherein the LCD comprises a backlight module, a panel, and a multi-light driving device, the backlight module has a plurality of light-emitting units, and the panel has a plurality of scan lines, the method comprising: a first brightness adjusting step for adjusting relative brightness between the light-emitting units with the multi-light driving device, wherein a screen of the panel presents a dark zone caused by the brightness distribution of the light-emitting units, and the dark zone includes one the scan lines, which is being activated. The combination of the closest prior art of Kuo et al. (US 6,943,784) and Baba et al. showed a similar invention, however, they fail to teach a second brightness adjusting step for readjusting the relative brightness of the light-emitting units after a specific scan timing, wherein the dark zone is shifted and includes another one of the scan lines, which is being

activated after the specific scan timing as claim 1; or a multi-light driving device, which electrically connects to the backlight module and generates a plurality of driving signals, wherein the driving signals drive the light-emitting units respectively, the multi-light driving device adjusts the current levels of the driving signals in sequence according to the system timing signal to change the brightness of the light-emitting units in sequence, and the screen of the panel presents a dark zone caused by the brightness distribution of the light-emitting units and including one of the scan lines, which is being activated as claim 9.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
